INCREASE PRODUCTIVITY AND PROFIT

RETIRE YOUR WHEELBARROW AND UPGRADE TO A POWER DUMPER BUGGY

Bartell Global has developed a proven product that helps contractors transport materials like concrete, soil, and gravel easily around job sites. Benefits include increased productivity, reduced injuries (especially back injuries), decreased labor costs, and more capacity for bigger projects.

- Dump and drive capability allows for feathering of load in forward and reverse
- Operator's platform with simple control system for comfortable and convenient operation
- Excellent traction & control with heavy-duty welded chassis
- High density poly bucket standard on DB17
- Steel bucket standard on DB21, upgrade available on DB17
- Power supplied through heavy-duty hydraulic pump and two high-efficiency hydrostatic drive motors
- Foot operated dump lever allows operator to keep both hands on steering handle at all times
- Foot actuated operating pedal and parking brake
- Electric start available
- Optional foam-filled tires available
